RMI Report
2022

Learning tools
in the RMI Report 2022

Responsible Mining Foundation
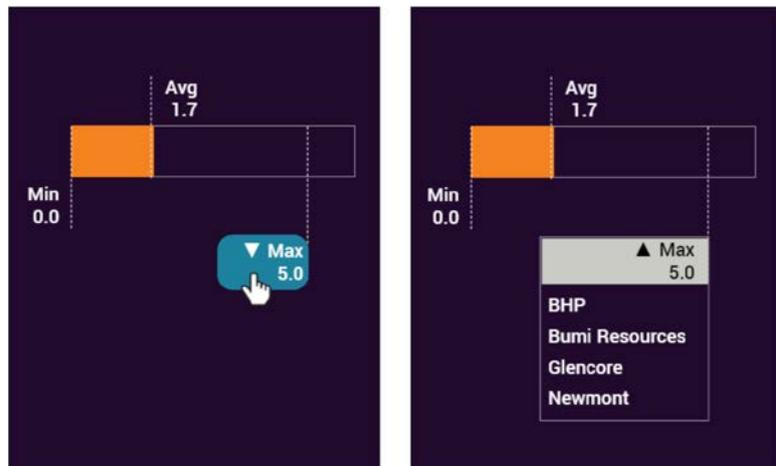

Learning tools in the RMI Report 2022

The full results of the RMI Report 2022 are available online at:
https://2022.responsibleminingindex.org/. The website contains much more information than this summary report, including individual result pages for the 40 companies and for the 250 mine sites assessed. Many additional resources are also available on the website, including the learning tools introduced here. Companies are encouraged to make use of these tools learning tools embedded in the digital RMI Report 2022, to help inform and guide their ESG strategies and actions.
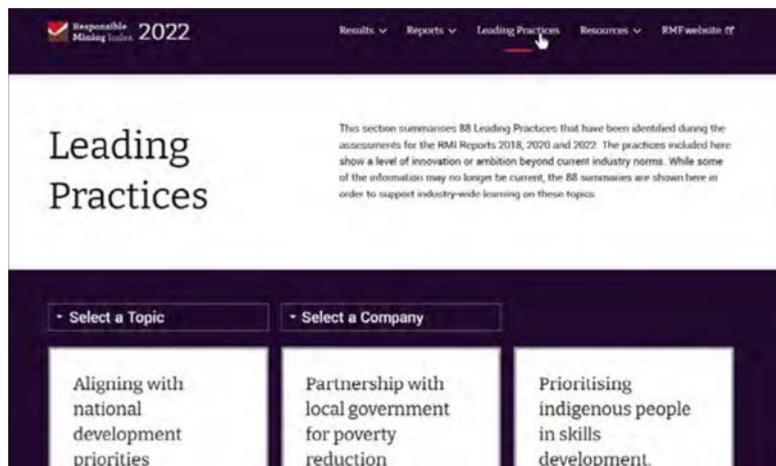

Which companies show better practices?

The overall results on each indicator highlight the maximum score achieved and the name of the company/companies achieving this score. Users can then click on the company name(s) to be directed to their results page(s) for more information.

What leading practices have been identified?

Summary descriptions are provided of nearly 100 examples of leading practices, identified in the three RMI Reports published to date. The summaries enable users to learn about the issue addressed, the context, the main actions taken and, wherever possible, the outcomes achieved. Go to the Leading Practices.

What is the raw data behind the results?

Raw data files are provided to show all indicator-level scores for the 40 companies and 250 mine sites, as well as each company's thematic area and measurement area scores. The overall average score and Collective Best Scores for each thematic area and transversal issue are also provided, and the contextual data relating to each company and mine site assessed. Go to the Raw Data.

How are companies assessed on each issue?

A Scoring Framework shows the specific criteria used to assess each metric question, to show the open and robust nature of the assessment and to enable companies to see the detailed basis for their scores. Go to the Scoring Framework.

What documentary evidence was used in the assessment?

An interactive library of the 6,550 pieces of documentary evidence used in the assessment provides a rich resource for companies to use to see, for example, what a top-scoring mine closure standard or human rights due diligence report looks like. Documents are available in multiple languages and are directly downloadable from the RMI Report website. Go to the Document Library.

Disclaimer

The findings, conclusions and interpretations within this RMI Report 2022 do not necessarily represent the views of funders, trustees, and employees of the Responsible Mining Foundation (RMF), and others who participated in consultations and as advisors to the report.

This report is intended to be for information purposes only and is not intended as promotional material in any respect. The report is not intended to provide accounting, legal, tax or investment advice or recommendations, neither is it intended as an offer or solicitation for the purchase or sale of any financial instrument. In order to fully understand the methodology of the RMI Report 2022, the respective sections on the website should be consulted.

The RMI Report 2022 seeks evidence of companies' policies and practices on economic, environmental, social and governance (EESG) issues, but does not seek to measure the actual outcomes achieved on EESG issues. Results are based only on evidence sourced from the public domain or provided by companies as open data. Whilst this information is believed to be reliable, no guarantee can be given that it is accurate or complete, nor does it preclude the possibility that policies and practices may exist, but which the RMI Report 2022 has not been able to consider for purposes of assessment. In this respect, the results of the low-scoring companies do not necessarily reflect a lack of relevant policies and practices; as they may be due to a lack of public reporting by the companies, limitations in accessing information, and/or any difficulties in accessing the RMI company portal.

It should be noted that, prior to publication, all companies in the RMI were invited to check the factual accuracy of the contextual data and evidence upon which the RMI is based and to review company information in the RMI document library.

Country borders or names on maps do not reflect an official position of the RMF or anyone involved in its governance, employees or in service providers. Maps used are for illustrative purposes and do not imply the expression of any opinion on the part of the RMF, concerning the legal status of any country or territory or concerning the delimitation of frontiers or boundaries. Where needed, approaches used by the UN to present borders were followed.

Although every effort has been made to verify the accuracy of translations, the English language version should be taken as the definitive version. The RMI reserves the right to publish corrigenda on its web page, and readers of the RMI Report 2022 should consult the web page for corrections or clarifications **www.responsibleminingindex.org**.
